## PRICE ADDITIONS FOR BOOSTER PUMPS (Add to Price of Standard Booster Pump)

### Motors with Special Electrical Characteristics and Enclosures

These prices are subject to change without notice and supersede all previous quotations.

**NOTE:** How to calculate the price of a built-to-order Booster Pump with a special motor:

1. Take base price from prices shown on front cover.
2. Locate the proper Booster in the Stock Booster Pump column.
3. Select the required motor horsepower rating listed in the special motor horsepower rating column.
4. Select the required motor enclosure column (ODP, TE or XP) and find the appropriate 1PH or 3PH price addition corresponding to the required booster and motor horsepower

Stock Booster Pump	Motor Horsepower		B&G Drip-Proof <sup>1</sup>		Totally Enclosed <sup>2</sup>		CL. I, GRP. D; CL. II, GRP. F&G Explosion-Proof <sup>4</sup>

**TABLE A**

**Available Voltage Ratings for Bell & Gossett 60 Hertz Motors**

Table A notes standard voltage ratings for B&G sleeve bearing or ball bearing Booster Pump motors. These motors are designed to NEMA Standards and will operate satisfactorily at voltages plus or minus 10% of their rated voltage. If a Booster Pump is required with a voltage rating within 10% of the voltages listed below, the required HP motor with the respective standard voltage shown in Table A will be shipped. An M72152 Motor Voltage Tag regarding the plus or minus 10% variation will be attached to motor.

VOLTAGE RATING	HORSEPOWER
